

News Announcement (12/6/2024)

Bruce Spengler, President of Calvert Masonry for the past 14 years and 22+ years overall with the firm, is stepping down as President effective December 16, 2024. Bruce will continue to serve as Board Chair, and to assist in Management and Estimating, in 2025.

John Young will assume the role of President at that time. He has served in field and project management roles throughout his 14-year career at Calvert, including the past 4 years as Vice President. His work on traditional masonry, restoration and rainscreen projects will be instrumental in leading Calvert into the future. John earned his Bachelor of Business Administration degree from Radford University, and his MBA from National University.

The Calvert leadership team moving forward with John is –

- Mike Kulp, head of Field Operations – Mike has been with Calvert since 2006, serving in field supervision and project management roles, leading to General Superintendent and his current role today. He has extensive experience in all markets and services that Calvert provides, with detailed expertise in our equipment and scaffolding systems. Mike is well known to our clients for his problem-solving skills, including flashing and leak investigation/repair services we provide on existing 3rd party buildings. Mike earned his Bachelor of Business Administration degree from Widener University.
- Mike Mallon, head of Estimating and Business Development – Mike has been working in the masonry business since his teenage years, in his family's masonry company until joining Calvert in 2011. After an initial stint in Project Management, Mike moved over to Estimating, progressing to Senior and Chief Estimator roles. His attention to detail and ability to estimate complex projects with logistics challenges has served Calvert well over the past 13 years.
- Anthony Bertrand, Project Executive – Anthony also has been working in the masonry business his entire career, which included running his own business until joining Calvert in 2016. His leadership and problem-solving skills on a number of Calvert's most difficult projects has significantly contributed to their success, while gaining a reputation with clients as a value-added partner.

The Calvert team looks forward to continuing our partnership with our clients and industry partners in the years ahead.
